UV-VIS 230 UV-visible spectrophotometer

Features:

The UV-Vis 230 is an intelligent ultra-violet/visible spectrophotometer that is well suited to the qualitative and quantitative analyses required by today's laboratories.

With its wide wavelength range and narrow bandwidth design, the instrument provides extraordinary flexibility and high resolution at an exceptional price.

It features a standard printer port for hard copy. The UV-Vis Spectrophotometer also features power interruption protection, easy operation and a versatile choice of accessories.

Our range of UV-Vis Spectrophotometers have the attraanalytical solutions. The easy display is great for industrial quality control, water analy-

sis, and educational purposes. The UV/Vis Spectrophotometer operates over a wavelength range of 190 - 1100 nm with a 5nm bandwidth. The spectrophotometer features a standard printer port and a standard RS-232 serial port.

The UV-Vis 230 has the capacity to analyze up to four cells and a choice of accessories for greater flexibility and active features of simple operation and high reproducibility, yet provide cost effective

Optional accessories

- 10/20/30/50mm path length glass and quartz cells
- Disposable cells
- Flow through cell

Specifications:

Wave length:	190-1100nm
Wavelength accuracy:	+/-2.0nm
Wavelength reproductively:	1.0nm
Photometric reproductively:	0.3%
Bandwidth:	2nm
Detector:	Silicone diode
Light source:	Tungsten halogen, D2
Display:	16 x 2 LCD
Dimensions:	530 x 410 x 210mm
Weight:	16 kg
Power:	110v/230 50/60hz 120w
