The Tourist

"The Tourist system is a generic test platform, which means users can enter any number of chemicals or analytes of interest to test the underlying FAIMS detection capability.."

Tourist is a lab based test platform incorporating Owlstone's proprietary FAIMS technology. The technology is suitable for detection applications that demand high performance, affordability and small form factor. The Tourist test platform enables potential users to quickly establish the suitability of FAIMS for their detection needs.

What is the Tourist?

The Tourist system is a generic test platform, which means users can enter any number of

chemicals or analytes of interest to test the underlying FAIMS detection capability. Whether testing organic compounds in industrial applications or chemical warfare agents, the Tourist system provides fast answers to questions such as limits of detection and performance in mixtures.

Product features

- Comprehensive test platform with compact footprint
- Fast answers. The Tourist system is easy to set up and run and you'll be getting detection results as soon as you switch it on.
- Using FAIMS to solve your detection problems, in the field, in shorter time frame
- Complete flexibility to change and optimize control parameter for your target application
- Can be used to test suitability of FAIMS for any application area of interest
- Cost effective tool to accelerate development and prove suitability

Price and availability

For prices please email sales@mindex-ltd.co.uk and we shall provide a competitive price.
