**SINDIE ON THE GO—Sulphur analyser for petroleum****Details:**

There is a first for everything and here's a new one for sulphur analysis the first portable sulfur analyzer that provides reliable quality results from the ultra low sulphur diesel and gasoline, to marine fuels and crude's.

The SINDIE ON THE GO 7039 is the ultimate dual use portable and bench top sulphur analyser which uses Monochromatic WD XRF technique per ASTM D7039. the standard for this analyser will measure sulfur concentration from 1.0 ppm to 10 wt%.

SINDIE OTG uses preassembled ACCU-CELL sample cups, designed to keep the sample and cup free of external contamination and particles. ACCU -CELL cups eliminate the need for the user to put together the various separate film and cup components . The cups are prevented so there no need for the users to punch a hole

in the sample cup. One standard 2ml pipette will fill the cup and that's it. Analysis on demand where when you need it..

**Typical product applications**

- Total sulphur from ultra low sulphur fuels up to crude
- Designed for refinery labs, pipeline terminals, onboard use, additive plants, testing vans and inspection laboratories

**Dimensions**

11.5 (h) x 13.5 (w) x 8 (d)

**Weight**

18lbs

**Utility**

Standard wall power 100-120 VAC and 200-240VAC

**Dynamic range**

1.0ppm up to 10%

**Repeatability (95%) confidence 5ppm 0.78ppm**

8ppm 1.10ppm

15ppm 1.51ppm

50ppm 2.76ppm

500ppm 8.74 ppm

**Price and availability**
